EXPERIMENTAL FEEDING (Cont'd)

Information given is based purely on experimental work being done by the Flordelwa Corporation of St. Petersburg, manufacturers of PERFECT Plant Foods. It is not a guarantee of results and data so far gathered is not sufficient to warrant more than the statement that the process outlined "appears" at this time to show fair promise in aiding recovery of Hibiscus which have been severely damaged by freezing yet are, in some manner, indicating life remaining in the lower root and stem system. The information is released in the hope that some prized plants may recover with careful "nursing" and extreme care.

"IT PAYS TO ADVERTISE"

A lion met a tiger
As they drank beside a pool.
Said the tiger, "Tell me why
You're roaring like a fool."
"That's not foolish," said the lion,
With a twinkle in his eyes,
"They call me the king of beasts,
Because I advertise."
A rabbit heard them talking
And ran home like a streak,
He thought he'd try the lion's plan,
But his roar was but a squeak.
A fox came to investigate--
Had luncheon in the woods,
So, when you advertise, my friends,
Be sure you've got the goods.

WINTER CULTURE

This is a little early for Spring Culture and a lot too late for Winter Culture. All of your fertilizer changes should have long been made by now. You should not be feeding nitrogen, or at least a very small amount. The nitrogen will stimulate new growth and this is what we do not want at this time of the year.

Switch to a low nitrogen fertilizer at once if you are not using it now. We want to get hardened growth on the plants before danger of frosts. Don't just stop feeding, hibiscus need to eat in the winter too. Not as much but they do like to eat a little. Don't forget the water. They like a drink now and then too. If a cold snap is forecast be sure that the plants are well watered in advance of the cold.

Do you have the plastic on your house? Do you have the plastic on hand? Nails? Stripping? Wire? How about wood that needs replacing? Repairs to wire and benches? Can you get all the plants in, that you now have? These are some of the questions you need to think about if you have a plastic house.

You say that you don't have a plastic house? Well here are some questions for you. What are you going to bank with? Leaves? Straw? Soil? Has it been
